

Kapellbrücke and Wasserturm

1145 Teile · 110 verschiedene Teile

Ein Souvenir-Modell aus Klemmbausteinen, kompatibel mit Standardsteinen.
Auf dem Sockel: 25.6 × 27.2 cm, 17 cm hoch.

Teileliste und BrickLink-Wanted-List: siehe Projekt-Website.

DAS WAHRZEICHEN

Kapellbrücke and Wasserturm

Die Kapellbrücke ist eine gedeckte Holzbrücke für Fussgänger, die schräg über die Reuss führt, gleich neben dem steinernen Wasserturm. Zusammen sind die beiden das Wahrzeichen von Luzern. Sie ist eine der ältesten gedeckten Holzbrücken Europas, und Bilder unter ihrem Dach erzählen die Geschichte der Stadt.

Mitten in der Luzerner Altstadt, wo die Reuss aus dem Vierwaldstättersee fliesst, ein paar Minuten zu Fuss vom Bahnhof.

Erbaut	Wasserturm um 1300; Brücke um 1365
Länge	heute etwa 205 m; ursprünglich etwa 279 m
Wasserturm	etwa 35 m hoch, achteckig, Mauern bis zu 3 m dick
Bilder	ursprünglich 158 dreieckige Tafeln, im 17. Jahrhundert gemalt
Benannt nach	der Peterskapelle am Nordende der Brücke
Das kannst du tun	gratis darüber spazieren, zu jeder Tageszeit

Durch die Jahrhunderte

- um 1300** ● Der achteckige Wasserturm wird als Teil der Stadtbefestigung in den Fluss gebaut.
- um 1365** ● Die gedeckte Brücke entsteht. Sie verbindet die beiden Hälften der Altstadt und schützt die Stadt zugleich vor Angriffen mit Booten vom See her.
- 17. Jahrhundert** ● Hans Heinrich Wägmann malt auf Tafeln unter dem Dach Szenen aus der Schweizer und Luzerner Geschichte und aus dem Leben der Heiligen Leodegar und Mauritius.
- 1833 bis 1898** ● Die Ufer werden für neue Strassen und Quais aufgeschüttet. Die Brücke verliert am Südende etwa 75 m und am Nordende noch ein kleines Stück.
- 1892** ● Alpensegler beginnen, im Wasserturm zu nisten. Die Störche hatten ihr Nest auf dem Dach ein paar Jahre zuvor verlassen.
- 1919** ● Das Stadtarchiv zieht endlich aus dem Turm aus.
- 18. August 1993** ● Ein Brand zerstört grosse Teile der Brücke und die meisten Bilder.
- 14. April 1994** ● Die wiederaufgebaute Brücke wird eröffnet, weniger als acht Monate nach dem Brand.

GENAUER HINSCHAUEN

Ein Turm für alles

Im Lauf der Jahrhunderte war der Wasserturm Wachtposten, Gefängnis und Folterkammer, Schatzkammer und Stadtarchiv. Seinen Namen hat er ganz einfach daher, dass er im Wasser steht. Heute nutzt ihn ein lokaler Artillerieverein, und er ist nicht öffentlich zugänglich.

Feuer auf dem Fluss

In einer Sommernacht 1993 fing die alte Brücke Feuer, vielleicht wegen einer achtlos weggeworfenen Zigarette. Viele der alten Bilder gingen verloren. Schau beim Überqueren genau hin: An manchen Stellen siehst du noch verkohlte Reste der alten Bilder.

Segler statt Störche

Schau im Sommer zur Spitze des Wasserturms hinauf. Schnelle, dunkle Vögel jagen kreischend um ihn herum. Es sind Alpensegler, und sie nisten seit 1892 im Turm. Es ist eine der grössten Kolonien der Zentralschweiz.

SO FINDEST DU ES IN LUZERN

Adresse

Kapellbrücke, 6002 Luzern

Anreise

Etwa fünf Minuten zu Fuss vom Bahnhof Luzern:
Geh dem Fluss entlang Richtung Altstadt.

Tipp

Für das klassische Foto stell dich am frühen Morgen, wenn es auf der Brücke noch ruhig ist, auf die Seebrücke oder an den Quai beim Bahnhof. Dann geh langsam hinüber und schau hinauf zu den Bildern.

Letztes Kapitel

Der Sockel

Jedes Modell der Serie steht auf demselben schwarzen Sockel mit Namensschild, so reihen sich deine Souvenirs im Regal. Baue die schwarze Leiste, drücke sie unter die Vorderkante des Modells und die kleinen 2 × 4-Platten (die Füße) unter die hinteren Ecken. Dann das Etikett von der Namensschild-Seite auf die beige(n) Fliesen kleben.

Dein Namensschild

Diese Seite in 100 % drucken (nicht „an Seite anpassen“), ein Etikett entlang der grauen Linie ausschneiden und auf das beige 2 × 8-Namensschild des Sockels kleben. Tipp: Etikettenpapier oder ein Streifen Klebeband darüber hält länger.

Das leere Storchennest

Schau ganz oben auf die Spitze des Wasserturms: Auf dem Helm sitzt ein kleines braunes Nest.

Seit mehr als hundert Jahren brüten keine Störche mehr auf dem Turm, aber das Nest ist immer noch da. Seit 1892 wohnt stattdessen eine grosse Kolonie Alpengler unter dem Dach.

Die Brücke im Modell ist verkürzt; die echte ist rund 200 Meter lang und die zweitlängste gedeckte Holzbrücke Europas.
