

Kapellbrücke and Wasserturm

1145 pièces · 110 références

Un modèle souvenir en briques, compatible avec les briques standard.

Sur son socle : 25.6 × 27.2 cm, 17 cm de haut.

Liste des pièces et Wanted List BrickLink : voir le site du projet.

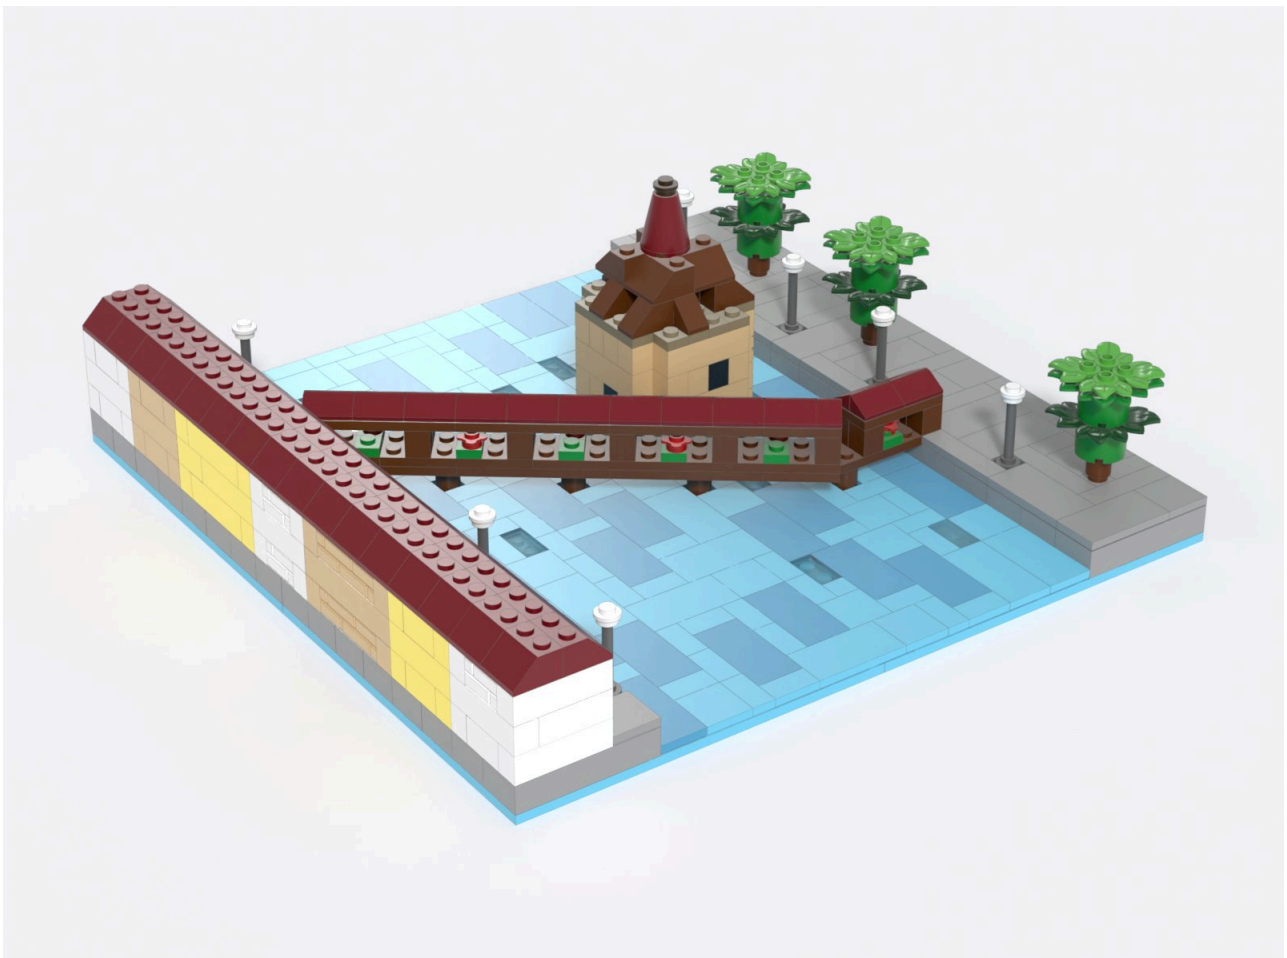

LE MONUMENT

Kapellbrücke and Wasserturm

Le pont de la Chapelle est une passerelle couverte en bois qui traverse la Reuss en biais, à côté de la tour de l'Eau, en pierre. Ensemble, ils sont le symbole de Lucerne. C'est l'un des plus anciens ponts couverts en bois d'Europe, et des peintures sous son toit racontent l'histoire de la ville.

En plein cœur de la vieille ville de Lucerne, là où la Reuss sort du lac des Quatre-Cantons, à quelques minutes à pied de la gare.

Construction	tour de l'Eau vers 1300 ; pont vers 1365
Longueur	environ 205 m aujourd'hui ; environ 279 m à l'origine
Tour de l'Eau	environ 35 m de haut, octogonale, murs épais jusqu'à 3 m
Peintures	à l'origine 158 panneaux triangulaires, peints au 17e siècle
Nom	d'après la chapelle Saint-Pierre, au bout nord du pont
Ce que tu peux faire	le traverser gratuitement, à toute heure

Au fil des siècles

- vers 1300** ● La tour de l'Eau, octogonale, est construite dans la rivière pour défendre la ville.
- vers 1365** ● Le pont couvert est construit. Il relie les deux moitiés de la vieille ville et protège aussi la ville contre les attaques en bateau venant du lac.
- 17e siècle** ● Hans Heinrich Wägmann peint sur des panneaux sous le toit des scènes de l'histoire suisse et lucernoise, et de la vie des saints Léger et Maurice.
- 1833 à 1898** ● Les rives sont remblayées pour de nouvelles rues et de nouveaux quais. Le pont perd environ 75 m à son extrémité sud, et encore un petit bout à son extrémité nord.
- 1892** ● Des martinets à ventre blanc commencent à nicher dans la tour de l'Eau. Les cigognes avaient quitté leur nid sur son toit quelques années plus tôt.
- 1919** ● Les archives de la ville quittent enfin la tour.
- 18 août 1993** ● Un incendie détruit une grande partie du pont et la plupart des peintures.
- 14 avril 1994** ● Le pont reconstruit rouvre, moins de huit mois après l'incendie.

REGARDE DE PLUS PRÈS

Une tour à tout faire

Au fil des siècles, la tour de l'Eau a servi de poste de guet, de prison et de chambre de torture, de trésor et d'archives de la ville. Son nom vient tout simplement du fait qu'elle se dresse dans l'eau. Aujourd'hui, une société d'artillerie locale l'utilise, et elle n'est pas ouverte au public.

Le feu sur la rivière

Par une nuit d'été de 1993, le vieux pont a pris feu, peut-être à cause d'une cigarette jetée sans faire attention. Beaucoup des anciennes peintures ont été perdues. Regarde bien en traversant : par endroits, tu vois encore des restes calcinés des anciennes peintures.

Des martinets, pas des cigognes

En été, regarde le sommet de la tour de l'Eau. Des oiseaux sombres et rapides tournent autour en criant. Ce sont des martinets à ventre blanc, et ils nichent dans la tour depuis 1892. C'est l'une des plus grandes colonies de Suisse centrale.

OÙ LE TROUVER À LUCERNE

Adresse

Kapellbrücke, 6002 Luzern

Pour y aller

Environ cinq minutes à pied depuis la gare de Lucerne : marche le long de la rivière en direction de la vieille ville.

Conseil

Pour la photo classique, place-toi tôt le matin, quand le pont est calme, sur le Seebrücke ou sur le quai près de la gare. Ensuite, traverse-le lentement et lève les yeux vers les peintures.

Le socle

Chaque modèle de la série repose sur le même socle noir avec une plaque nominative : tes souvenirs s'alignent sur l'étagère. Construis la bande noire, emboîte-la sous le bord avant du modèle, puis les petites plaques 2×4 (les pieds) sous ses coins arrière. Colle ensuite l'étiquette de la page « plaque nominative » sur les tuiles beiges.

4

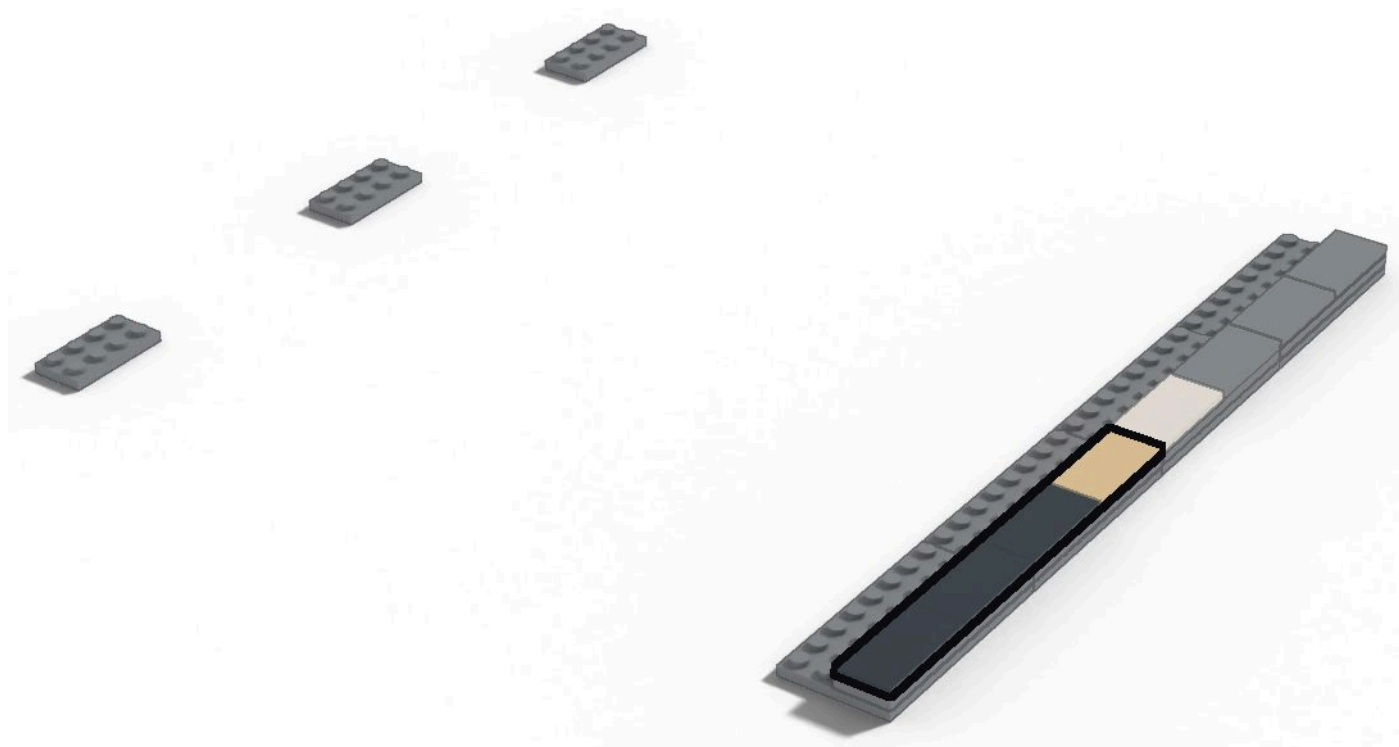

Le socle

5

tourne le modèle

Ta plaque nominative

Imprime cette page à 100 % (sans « ajuster à la page »), découpe une étiquette le long du trait gris et colle-la sur la plaque beige 2 × 8 du socle. Conseil : du papier autocollant ou une bande de ruban adhésif transparent par-dessus la fait durer plus longtemps.

Le nid de cigogne vide

Regarde tout en haut du Wasserturm : un petit nid brun est posé sur la flèche.

Les cigognes ne nichent plus sur la tour depuis plus de cent ans, mais le nid est toujours là. Depuis 1892, c'est une grande colonie de martinets à ventre blanc qui habite sous le toit.

Le pont du modèle est raccourci : le vrai mesure environ 200 mètres, c'est le deuxième plus long pont couvert en bois d'Europe.
