LE MONUMENT

St. Peter

L'église Saint-Pierre est la plus ancienne église paroissiale de Zurich, et sa tour porte les plus grands cadrans d'horloge d'église d'Europe. Pendant des siècles, cette horloge a donné l'heure à toute la ville. En dessous, l'église est une salle baroque claire, calme et lumineuse.

Au fil des siècles

- 8e ou 9e siècle** ● Une petite église d'environ 10 mètres sur 7 se dresse ici, près de l'ancien fort romain du Lindenhof.
- vers 1000** ● Elle est remplacée par une église plus grande, de style roman primitif.
- vers 1230** ● Une nouvelle église est construite. La partie basse de la tour actuelle date de cette époque.
- 1360** ● Rudolf Brun, premier Bürgermeister (maire) de Zurich, est enterré dans l'église.
- vers 1450** ● La tour est surélevée et reçoit une nouvelle flèche.
- 1538** ● Quatre cadrans sont posés sur la tour.
- 1705 à 1706** ● La nef est reconstruite en environ 17 mois. C'est la première nouvelle église de Zurich depuis la Réforme.
- 1880** ● Cinq nouvelles cloches sont fondues. La plus grande pèse plus de six tonnes.
- 1911** ● Le dernier guetteur d'incendie quitte la tour.

REGARDE DE PLUS PRÈS

L'heure pour toute la ville

Avant que tout le monde ait une montre, les Zurichois levaient les yeux vers Saint-Pierre pour connaître l'heure. Les énormes chiffres dorés mesurent presque un mètre. Les cadrans sont si grands que tu peux lire l'heure de très loin.

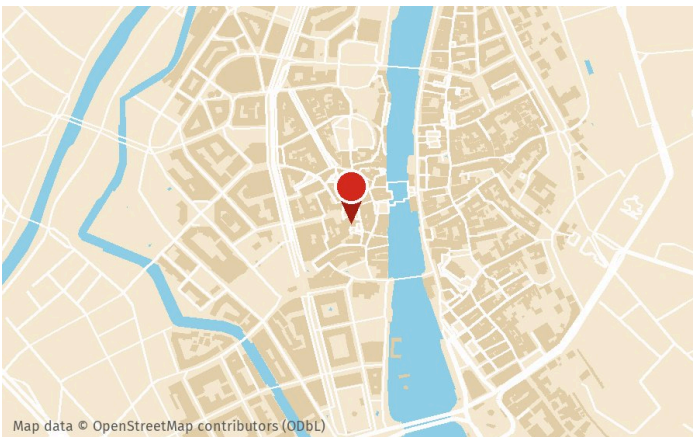

Le guet du feu

Jusqu'en 1911, un guetteur vivait tout en haut de la tour. Jour et nuit, il surveillait les toits de la vieille ville. S'il voyait de la fumée, il donnait l'alerte, pour qu'on puisse combattre le feu avant qu'il ne se propage.

Un pasteur célèbre

Johann Caspar Lavater, écrivain connu dans toute l'Europe au 18e siècle, a été pasteur ici de 1778 à 1801. Sa pierre tombale est encastrée dans un mur de l'église. Sauras-tu la trouver ?

Le socle

Chaque modèle de la série repose sur le même socle noir avec une plaque nominative : tes souvenirs s'alignent sur l'étagère. Construis la bande noire, emboîte-la sous le bord avant du modèle, puis les petites plaques 2 × 4 (les pieds) sous ses coins arrière. Colle ensuite l'étiquette de la page « plaque nominative » sur les tuiles beiges.

Ta plaque nominative

Imprime cette page à 100 % (sans « ajuster à la page »), découpe une étiquette le long du trait gris et colle-la sur la plaque beige 2 × 8 du socle. Conseil : du papier autocollant ou une bande de ruban adhésif transparent par-dessus la fait durer plus longtemps.

Étiquettes en trois couleurs au choix : beige, bleu marine, rouge suisse.

La lanterne du guetteur

Regarde dans l'étage le plus haut de la tour, juste sous la flèche : une petite lumière jaune y brille.

Du Moyen Âge jusqu'en 1911, un guetteur d'incendie vivait en haut de la tour de Saint-Pierre. Jour et nuit, il surveillait les toits de Zurich et donnait l'alerte s'il voyait de la fumée ou des flammes.

Aujourd'hui encore, la tour appartient à la Ville de Zurich et la nef à la paroisse.
